

Ikea Hacking

IKEA HACKING PRODUCTS

MADE BY LAURA ELLEMARK LANGE & ROSALINA KRUSE

MADE TOGETHER WITH IKEA ON
KRABBESHOLM MAY2011

Dear Reader

You probably have the same experience as we do with the entrance hall in the average apartment: It is too little, too dark, too messy and no place for tying your shoes. Therefore we have tried to solve the problem. As two poor studying girls, we can't effort expensive designer furniture, for that reason we decided to hack products from IKEA and make them our own design. This is our little guide to an easier way of living.

Good luck!

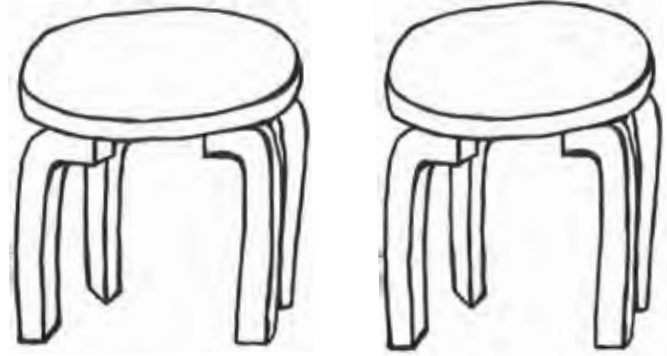

Laura & Rosalina
